

Cash Register Results

This screenshot shows the Cash Register application running in the NetBeans IDE. The application window displays the following information:

- Enter UPC: 111
- Submit and Reset buttons
- Result: Name: Milk Price: 4.49 UPC: 111

The IDE background shows the source code for `CashRegisterApp.java` and the `intComponents` window. The output console shows the following messages:

```
Running NetBeans Compile On Save execution. Phase execution is skipped and output directories of dependency projects (with Compile on Save turned on) will be used instead
Scanning for projects...
-----c com.mycompany.CashRegisterApp -----
Building CashRegisterApp 1.0-SNAPSHOT
-----[ jar ]-----
--- exec-maven-plugin:3.0.0:exec (default-cli) @ CashRegisterApp ---
```

This screenshot shows the Cash Register application running in the NetBeans IDE. The application window displays the following information:

- Enter UPC: 112
- Submit and Reset buttons
- Result: Name: Cookies Price: 4.99 UPC: 112
